

Shanghai Jiao Tong University

AU420 Introduction to Java Programming

Instructor:	Chentao Wu	Email:	wuct@cs.sjtu.edu.cn
Instructor's Home Institution:	Shanghai Jiao Tong University	Office:	TBD
Office Hours:	TBD		
Term:	May 27-June 27, 2019	Credits:	4 units
Classroom:	TBD	Teaching Assistant(s):	TBD
Class Hours:	Monday through Thursday, 120 mins per teaching day		
Discussion Sessions:	2 hours each week, conducted by teaching assistant(s)		
Total Contact Hours:	66 contact hours (1 contact hour = 45 mins, 3000 mins in total)		
Required Texts (with ISBN):	W. Savitch, Pearson (2015) <i>Java, An Introduction to Problem Solving & Programming</i> , 7th edition ISBN-13: 978-0133766264 ISBN-10: 0133766268		
Prerequisite:	MA077 Linear Algebra		

Course Overview

This course offers an introduction to computer science and computer programming in Java. With emphasis on object-oriented programming practice and problem-solving skills, the course presents a balanced coverage of Java language basics, programming concepts and techniques, standard algorithms and applications.

Learning Outcomes

On successful completion of the course, the student should be able to

- ✧ Provide an overview of the Java programming language
- ✧ Describe the basic techniques of computer program in general and object-oriented in particular
- ✧ Define Java classes and methods
- ✧ Design and implement simple computer programs in Java that are correct, clear, well-organized and well-documented
- ✧ Apply simple data structures and algorithms to solve problems
- ✧ Use Linux systems to write, debug, and execute programs

Grading Policy

✧ Class Attendance and Participation

You are expected to attend each class session. You will be responsible for all material covered during any absence. Your active participation in class discussions is very much encouraged and it will definitely enhance the learning process.

✧ Reading and Preparation

You are expected to read the assigned chapters/sections before the class session in which they will be discussed.

✧ Programming Projects

Programming projects will be assigned during the term in order to facilitate your understanding of the material, and will be due on a designated date and time. They will be collected and graded. Projects will be graded based on their correctness and completeness, the efficiency and presentation. In general late projects will not be accepted for credit.

✧ Quizzes

A number of quizzes will be given throughout the summer course.

✧ Exams

There will be a midterm exam and a final exam. Exams will be comprised of questions and problems based upon textbook, topics covered in the class.

Quizzes	15%
Participation & Professional Classroom Conduct	5%
Programming Projects	20%
Midterm	25%
Final Exam	35%

Grading Scale

Number grade	Letter grade	GPA
90-100	A	4
85-89	A-	3.7
80-84	B+	3.3
75-79	B	3
70-74	B-	2.7
67-69	C+	2.3
65-66	C	2
62-64	C-	1.7
60-61	D	1
≤59	F (Failure)	0

Academic Dishonesty

Acts of academic dishonesty include:

- unauthorized assistance on an examination;
- falsification or invention of data;
- unauthorized collaboration on an academic exercise;
- plagiarism;
- misappropriation of resource materials;
- any unauthorized access of an instructor's files or computer account; or
- any other serious violation of academic integrity as established by the instructor."

Class Schedule (Subject to Change)

Date	Lecture
Day 1	Overview of computer hardware, software, computer programming and applications
Day 2	Java variable types, expressions, simple I/O
Day 3	Java flow of control and basic programs-1
Day 4	Java flow of control and basic programs-2
Day 5	Quiz 1 Object-oriented programming practice-1
Day 6	Object-oriented programming practice-2
Day 7	Java classes and methods-1
Day 8	Java classes and methods-2
Day 9	Arrays, and applications-1
Day 10	Arrays, and applications-2 Quiz2
Day 11	Simple sorting algorithms-1
Day 12	Simple sorting algorithms-2
Day 13	Java streams and file I/O-1
Day 14	Java streams and file I/O-2
Day 15	Recursion and applications-1
Day 16	Recursion and applications-2 Quiz 3
Day 17	Basic GUI programming-1
Day 18	Basic GUI programming-2
Day 19	Summary
Day 20	Final Exam
