## Course Overview and Learning Outcomes

Economics is a social science that studies choice behavior. Macroeconomics is the branch of economics that deals with “macro,” i.e., big economic objects. It studies the behaviors and interactions of *aggregate economic variables* such as the GDP, economy-wide consumption, inflation, and unemployment. This introductory course will expose you to the fundamental concepts in macroeconomics and introduce you to the state-of-the-art understanding of what drive the economy to grow, what cause the inflation, why there is unemployment, and how government policies may influence it.

Upon completion of the course, you are expected to be able to:

1. Demonstrate understanding of the basic concepts in macroeconomics.
2. Demonstrate understanding of the basic mechanisms driving the movements of macroeconomic variables.
3. Demonstrate the ability to apply the basic tools of macroeconomics to analyze and understand current macroeconomic events.

## Course Structure

The medium of instruction consists of asynchronous recorded lectures, supplemented with synchronous office hours and online discussion via Blackboard discussion forum or WeChat group. The duration of the course is 20 days. There are in total 18 recorded lectures meant to cover 18 days of the course, with the remaining 2 days reserved for exams. Each lecture lasts approximately 70 to 90 minutes. There is a minimum of 3 hours of synchronous, interactive office hours and online discussion per week. The exact days and time for online office hours will be determined on a week-by-week basis based on the schedules of problem set due dates and the topics covered during the week. It will be communicated to students beforehand through the teaching assistant.

Evaluation of students consists of four problem sets and two open-book exams. No credits for attendance. Attendance of online office hours is not mandatory but highly encouraged.
